Technology Education Learning Standards

New York State MST Standards

[Standard 1: Analysis, Inquiry, and Design](#)

- Students will use mathematical analysis, scientific inquiry, and engineering design, as appropriate, to pose questions, seek answers, and develop solutions.

[Standard 2: Information Systems](#)

- Students will access, generate, process, and transfer information using appropriate technologies.

Standard 3: Mathematics

- Please visit the [Standards and Instruction website](#) for more information regarding NYS Mathematic Standards.

Standard 4: Science

- Please visit the [Standards and Instruction website](#) for more information regarding NYS Science Standards.

[Standard 5: Technology](#)

- Students will apply technological knowledge and skills to design, construct, use, and evaluate products and systems to satisfy human and environmental needs.

[CTE Team Contacts](#)

[Standard 6: Interconnectedness—Common Themes](#)

- Students will understand the relationships and common themes that connect mathematics, science, and technology and apply the themes to these and other areas of learning.

[Standard 7: Interdisciplinary Problem Solving](#)

- Students will apply the knowledge and thinking skills of mathematics, science, and technology to address real-life problems and make informed decisions.

National Standards

The following national standards can be used in addition to the New York State MST Standards for technology education courses.

[International Technology and Engineering Educators Association \(ITEEA\) Standards for Technological and Engineering Literacy \(STEL\)](#)
